

# BRIGHTSPARK

ACE ELECTRICAL NEWSLETTER

## WELCOME

Welcome to our 'BrightSpark' newsletter - a way for us to let you know what's happening in our business; to alert you to changes within the electrical industry; showcase new electrical products that can save time and money; showcase some of the interesting projects we've recently completed as well as introducing you to our team.

We'd love your feedback on the content of the newsletter - email: [office@aceelectrical.net.nz](mailto:office@aceelectrical.net.nz) - and go into the draw to **WIN** a bottle of wine.

### OPENING HOURS

Monday to Friday, 8.00am – 4.30pm

and we are on-call 24/7

We always have a team member on-call to sort out those little electrical issues that might pop up. There is of course a callout fee for this service, please check when ringing.

So if you need an electrician over the weekend please don't hesitate to call Ace Electrical on **0800 889 612** and we will be there!

## IN THIS ISSUE:

## RUSTIC CHARM MEETS MODERN COMFORT

Located less than 2kms from the Morrinsville town boundary in the Sunridge Park subdivision is Mark May's and Roz Reekie-May's stunning new home.

Having found the ideal spot to build on, with its close proximity to town, its beautiful views and the generous size section of almost one acre, Mark & Roz started the designing and planning process. With the help of their creative design person they put their ideas on paper and came up with a house plan that has a nice and natural flow.

In winter 2015 work commenced but due to the unpredictable weather there were delays and lots of mud! After eight months of construction Mark's and Roz's house was ready for them to move into with only the landscaping to be completed.

What Mark and Roz love the most about their new home is its rustic but modern look. It has a natural feel and free flow of space.

Special features like the macrocarpa bench top on the breakfast bar and the cedar doors with wrought iron knobs add plenty of character to the home. The inspiration for the ensuite, with its subway brick wall and natural slate tiles came from their travels to Moab, Utah and Colorado. A gym room was another feature that they wanted having had one in their previous home. The portico, located off the spacious open plan living areas, is in keeping with the rustic theme and is ideal for outdoor entertaining during the warmer months.

Their home was built by Grant McMillan who has done a great job. Mark and Roz also had some real tangible input during the building process. Not only did they paint the exterior of the house but Mark (who is in his 2nd year of a plumbing apprenticeship) undertook most of the plumbing himself. All the electrical work was carried out by Ace Electrical Services who specialise in new builds. The team at Ace Electrical were always on hand to give advice and guidance on all electrical matters when needed. They had the work completed on time with Mark and Roz being very happy with the final result.

# BRIGHT SPARK

## MEET THE TEAM

### INTRODUCING **TRENT MACE** APPRENTICE ELECTRICIAN

Trent is the youngest member of our team. He joined Ace Electrical after completing a pre-trade electrical course at Wintec. Trent has now completed two years of his electrical apprenticeship and is well on his way to becoming a fully qualified electrician.

In his free time Trent enjoys working out and has often been seen down at the local gym. But it's not all work and no play, Trent also likes to socialise outside of work hours and you will frequently find him at music festivals with his friends. He also has a desire to travel and see the world with Australia being his holiday destination this year.

## HOW HEALTHY IS YOUR HOME?

With winter fast approaching now is the time to think about how healthy your home really is.

Do you have:

- crying windows
- wet sills
- damp walls

If you answered **YES** to any of the above then you should consider installing a SmartVent home ventilation system.

We are all aware of visible condensation and mould, a direct result of excess moisture in the home. What isn't visible is the dampness and how this contributes to allergies and illness. Adequate ventilation of your home will keep you and your home healthy by reducing excess moisture, condensation and stale air.

SmartVent offers a range of solutions to achieve healthier, clean air quality in your home, including pressure systems, energy recovery and air transfer systems. Reduce condensation, circulate cool air or transfer excess heat.

The home ventilation evolution is here!

SmartVent Evolve includes multiple sensor technology to monitor both temperature and humidity to effectively control condensation. With an intelligent tablet controller to view and maintain your home's internal climate, SmartVent Evolve uses its sensor readings to draw air from the best air source and deliver fresher, drier, filtered air into your home.

#### SmartVent Evolve Controller

Become the climate expert in your home as the easy to use, fully automated controller works to maintain your comfort.

#### Superior Fans and Filtration

An advanced centrifugal fan draws air through SmartVent's F7 pleated filter. Better performing fan and filter to remove pollutants and improve air quality.

#### Temperature and Humidity Sensors

Fresh air is drawn into the home from the best possible location, whether this is roof space, outside or from within your home. The key component of Evolve is the multiple sensors that monitor the home and ensure the air delivered is the best available.

#### Stay Connected

The Evolve system includes a WiFi router so you can access it from anywhere and with the ability to download the latest updates, you will always have the latest in home ventilation technology.

SmartVent

We all deserve a warm, dry home. Don't put up with damp and mouldy conditions this winter. **Give us a call today at Ace Electrical on 0800 889 612 to arrange for a free, no obligation quote.**
