

BRIGHTSPARK

ACE ELECTRICAL NEWSLETTER

WELCOME

Welcome to our December 2017 'BrightSpark' newsletter – this is a way for us to let you know what's happening in our business; to alert you to changes within the electrical industry; showcase new electrical products that can save time and money; showcase some of the interesting projects we've recently completed.

We'd love your feedback on the content of our newsletter. Email us at office@aceelectrical.net.nz

OPENING HOURS

We will be closing on Friday 22nd December and reopen on Monday 15th January 2018.

We will have a team member "ON CALL" during the festive season to sort out those little "electrical" issues that might pop up. So if you find you need an electrician over the festive season, give the team at Ace Electrical a call on **0800 889 612**.

IN THIS ISSUE:

- LOULOUS SALON & DAY SPA
- RETHINK THE KITCHEN
- DID YOU KNOW

SHOWCASE: LOULOUS SALON & DAY SPA

Situated in the heart of Cambridge is Loulous Salon & Day Spa. Loulou's owner, Angelique has recently extended her hair dressing and beauty salon and it now includes a luxury day spa.

From the moment you walk through the doors you will be wowed by the extensive transformation that has taken place. At Loulous they have created an inviting and luxurious space where their clients can enjoy the ultimate pampering experience.

In the reception areas the company's name is proudly displayed by good use of accent lighting and the three beautiful chandeliers are a great example of feature lighting. In both the salon and day spa you will find a large range of products that have been cleverly displayed with specialised merchandise lighting.

Task lighting has been primarily positioned in the salon area to create the right balance of lighting over work spaces and counters. It is important for the hairstylists to have the best lighting possible when working with their clients. For those looking to relax and unwind

the float pod located in the new day spa along with the beauty treatment rooms are the perfect indulgence with the ambient LED lighting setting the scene.

Kelvin Lalich Builders have done an outstanding job in remodelling the existing salon along with creating the new day spa by integrating it into the shop next door.

The team at Ace Electrical are proud to have carried out the electrical work for Loulous Salon & Day Spa. Working alongside Angelique we were able to produce a high quality lighting and electrical plan including the installation of heat pumps, air handling and integrated music systems. There was a lot of work to be completed in a short amount of time and we are all thrilled with the end result.

BRIGHTSPARK

DID YOU KNOW

That we do electrical warrant of fitness's (EWOFF) for caravans and motor homes.

A current EWOFF is a requirement of law in New Zealand if your caravan or motor home is to be connected to the 230 volt supply system.

We can check if your caravan or motor home is electrically safe and fit to use. We will advise of any defects that need attention and carry out repairs if required including fitting of RCD's. Once your caravan or motor home has passed our inspection we will issue a EWOFF on the spot. Your EWOFF will be valid for 4 years from the date of issue.

If you are heading away this summer and your electrical WOF has expired then give us a call on 0800 889 612 to book in your caravan or motor home.

RETHINK THE KITCHEN

The kitchen is one of the busiest rooms in the home and it can quickly become a real clutter magnet. With so many activities going on in one space it's essential to create an orderly and functional environment.

When planning your kitchen remember to consider all the appliances that you love to use. Make allowances for plenty of power points right where you need them. You can avoid the clutter of cords by adding power points in the pantry. This lets you charge items such as mobile phones behind closed doors.

Good lighting in the kitchen is important to ensure that tasks can be carried out safely. Light dimmers are ideal for switching between the brighter light needed during cooking and mood lighting during dining. Consider adding a sensor light in your pantry to automatically turn the light on and off as required.

A great option, if your budget allows for it, is to install ceiling speakers. Listening to music is a great way to unwind while cooking up a storm or to entertain your guests while dining.

1. LED down lights

These energy efficient LED downlights are ideal for replacing your old halogen down lights

2. Micropush switch

For those who love unique design and the latest technology, this is a beautiful 2 way electronic switch with LED indicator

3. Data and phone socket

Be connected in style with this elegant data and phone socket

4. USB power point

Forget bulky adapters, plug your USB devices straight in for top speed charging

For more information about choosing the right fixtures and fittings for your home contact Ace Electrical today on 0800 889 612.
