

# BRIGHTSPARK

ACE ELECTRICAL NEWSLETTER

## WELCOME

Welcome to our 'BrightSpark' newsletter - a way for us to let you know what's happening in our business; to alert you to changes within the electrical industry; showcase new electrical products that can save time and money; showcase some of the interesting projects we've recently completed as well as introducing you to our team.

We'd love your feedback on the content of the newsletter - email: [office@aceelectrical.net.nz](mailto:office@aceelectrical.net.nz) - and go into the draw to **WIN** a bottle of wine.

### OPENING HOURS

Mon - Fri 8.30am - 4pm, and we are on-call 24/7

We always have a team member on-call to sort out those little electrical issues that might pop up, there is of course a callout fee for this service please check when ringing.

So if you need an Electrician over the weekend please don't hesitate to call Ace Electrical **0800 889 612** and we will be there!

## SHOWCASE

### ERIN ROPERS MORRINSVILLE HOME

Erin brought her land in 2013 and was designed by Erin herself and drawn up architecturally with the great help of Andrea Mead of Te Aroha.

The build got going in April 2014, the idea behind the design was mainly from her home in Cambridge, and bits from other homes she has owned over the years. Erin wanted it to be very open planned. Andrea was great she understood me and where I was coming from. This was the first time in her life she could have what she wanted and not have to consider other people.

It took 8 months until she could move in but there is, as always still lots to do. With 2 acres of land she has lots of time now to get her gardens done.

With curved walls put in the kitchen and small lounge, to the added touches of metal work, including a mantel piece, plant and toilet roll holder kindly made for by Morrinsville Engineering. This lovely home has many things to capture your attention.

She has a lovely Salt Water pool which has been a godsend for the summer. The pool also has night lights which change colour regularly which is a great feature when guests

are there. To the lovely gardens that surround the pool which are now starting to come away. The entertaining area is fabulous and if you drive past at night you can see the pool wall illuminated by lights.

As you can see from some of the photos it's a stunning place to look at, let alone live in.

The electrical work was all done by Ace Electrical Services, Erin found working with Ace Electrical very easy and Richard was happy to help with advice on lighting and where to have lights. "They were always there when I rang and ask them to be and never held me up at all". Erin was impressed with their professionalism and the staff members were always cleaning up after themselves.

## MEET THE TEAM

### INTRODUCING RICHARD O'NEIL ELECTRICIAN

Richard has worked for Ace Electrical for nearly 10 year now.

His interests are Fishing, duck shooting and snooker and pool. Which he does very well at all of these things recently he caught a 204.30KG Blue Marlin out of Whitianga it took him just 40 minutes to get it in. Not too bad for his first time.

Richard is known to many by his nickname **ROO**, which he had well before he came to work for Ace Electrical, on asking him how he got this I have found out that its nothing sinister at all just his initials.

Roo also enjoys a few drinks with his mates and can often be found at the T & C Club on the hill after a snooker or pool game or tournament enjoying a few beers.

A first time as a dad, his partner Rachel Arnold gave birth in September to a gorgeous little girl, Lila. She looks a little like Richard but thankfully mostly Rachel.

## WHY SOLAR POWER?

You have probably noticed the considerable attention solar power has been getting in the media recently. The solar industry is growing at a rapid rate – 400% faster than the government predictions in the last 12 months. There are now many thousands of New Zealand homes powering their lives with solar. The reason is very simple and straightforward: Solar makes you money!

We all love to live with electricity and it is fair to say electricity is a major contributor to the incredible advances we have seen in technology and living conditions over the last hundred years. Few people however consider the economic impact monthly power bills make to our financial position over the medium to long term. Take a typical small house with a power bill averaging around \$160 per month. Now most people can come up with \$160. It hurts to pay it but it doesn't seem excessive at face value. That is until you realise that \$160 is actually \$1,820 per year, or \$18,200 over the next ten years that you are going to spend on power and that assumes power prices stay the same but we all know that is not the case (power prices increased on average 118% between 2002 and 2012)!

In a lifetime we are condemned by the power companies to spend hundreds of thousands of dollars in power. Imagine now how excessive the figures a \$200 monthly bill represents, or \$300!

Enter solar. With a modest upfront cost a household can make drastic differences to their monthly power spend and the savings are immediate. From the very first month with a solar system you have more money in your pocket and these savings are every month – effectively forever. With outstanding warranty protection your investment is secure, it's a very easy and painless process, and it makes you money!

Ace Electrical is committed to providing outstanding service to our customers and will install your system to the highest quality standard. We have a wide range of systems to suit every home and budget. The sun hits your roof every day with free energy. See how you can profit from this. Call us today for a free, no obligation quote and let us show you how much extra money you could be enjoying every month!

## 5 REASONS TO CALL US FIRST

- 1** Availability - now for emergencies, or when you need us
- 2** Your job is the right size for us - no job is too big, small or ugly
- 3** On time, every time - and we'll guarantee that.
